

## Close security gaps at airport vehicular gates.

1. Comply with TSA Security requirements. Check individuals against the NO-FLY and SELECTEE terrorists lists.
2. Enable security personnel to perform an expedited and authentic ID review.
3. Eliminate anyone on the TSA list from escorting a vehicle entry.

AVEGASS is the only patent pending solution available, that can close the security gap.

### AVEGASS (AIRPORT VEHICULAR GATE SECURITY SYSTEM) INCREASES AIRPORT VEHICULAR GATE SECURITY USING STATE OF THE ART TECHNOLOGIES:

- > Identifies Airport Employee, ESCORT of the vehicle
- > Verifies employee current employment status
- > Instantly Checks the employee credentials against the TSA NO-FLY and SELECTEE lists
- > Reads and stores vehicle registration using the vehicle registration card
- > Identifies and Authenticates the vehicle driver ID
- > Checks the driver credentials against the TSA NO-FLY and SELECTEE lists
- > Identifies and Authenticates each vehicle passenger ID
- > Checks the passenger credentials against the TSA NO-FLY and SELECTEE lists
- > Supports unlimited number of passengers
- > Issues temporary entry photo badges
- > Issues temporary vehicle entry certificates
- > Instantly logs vehicle and all passengers exit
- > Applies Airport specific security entry rules
- > Web enabled entry reports through a VPN
- > Police Handheld reader capable of authenticating vehicles certificates within the airport perimeter
- > Easy to use: touch screen capable
- > Limited computer knowledge/no typing required
- > Interconnects between all Airport vehicular gates
- > Modular Design: enables security to add features and capabilities when security crew is ready
- > Takes less than 1 minute to process an entry including employee, vehicle, driver, and passengers.
- > Verifies large group credentials instantly against the TSA lists
- > Features a group list upload data through an intranet interface

### Software Option

AVEGASS Employee Check software allows an airport to comply with TSA requirements for airport' employees check against the TSA lists.

- > Use the software to upload a spreadsheet of the Airport employees and TSA lists.
- > Run the employee checks and obtain an instant verification report.

The system keeps a history of all checks and runs status (match or no match): date, time, matched names, etc...

### The Right Solution

Separate program allows instant update of the TSA lists. Just download the TSA spreadsheets, and specify the location of those files in the import software. The system imports all data within 90 seconds, allowing multiple updates, at any time.

#### System Requirements

You can run the lightweight AVEGASS with the following minimum requirements:

- > Windows XP Pro or Vista Business
- > 2.8GHz DualCore Intel Processor
- > 2GB of RAM
- > 250GB Drive
- > Touch Screen LCD Monitor (Suggested Resolution 1280x1024)
- > Astornet CAUTHS ID Authentication Device
- > Astornet Reveel-IT® reader
- > Color Laser printer
- > 8 ports powered USB 2.0 Hub
- > Color Badge Printer
- > Numeric Keypad with USB cable extension

#### Server Minimum Requirements

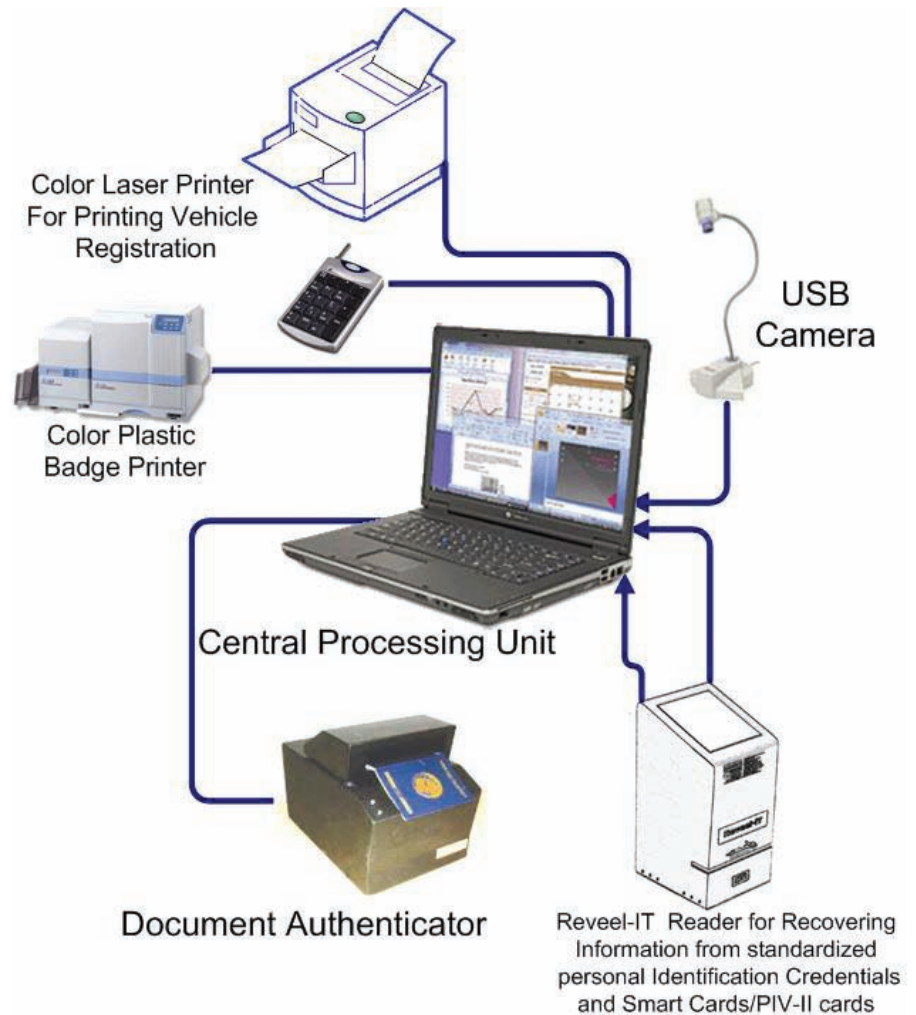

- > Dual DualCore Xeon 2.6GHZ Processors
- > 2GB ECC RAM
- > 500GB Drive
- > LCD Monitor
- > Windows 2003 Server
- > Windows SQL Server 2005
- > Active Directory
