You recognize the fact that security is a growing concern in today's world. So, how do you secure your entrances and keep accurate statistics on the traffic in your facility?

Express Admission was developed to help leaders like you reduce labor, liability, and increase security.

INCREASE PROFIT AND PEACE OF MIND

Express Admission, a state-of-the-art "access control" system, automates the identification of visitors and their admission to the building—all in just a few seconds.
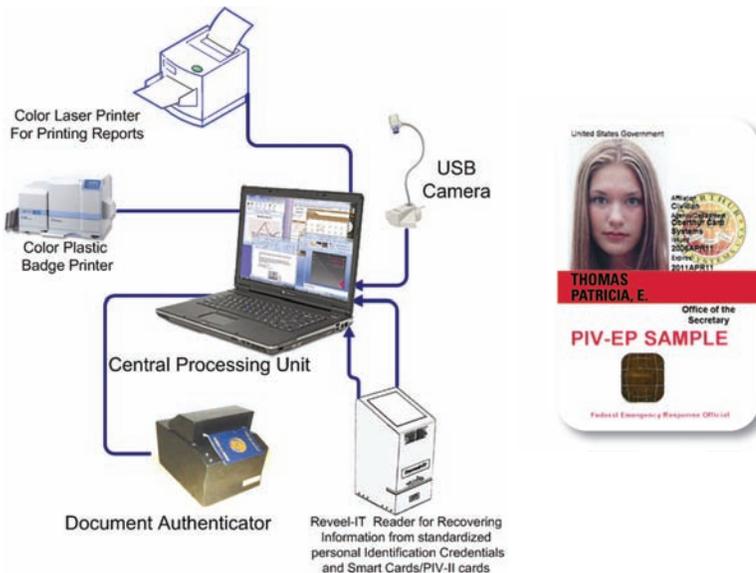

You'll save the cost of guards and manual reporting, minimize the likelihood of a liability suit and the millions of dollars in associated legal fees, and you'll likely save dollars on insurance premiums with enhanced security.

Building guests scan driver's license (US or Canadian) ➤ Camera snaps photo ➤ Within seconds a bar coded photo ID is printed

And, at the push of a button, you can get a report that tells you exactly who is in the building at any given moment—all with 99.9% accuracy. Plus, the system archives id information and digital photos of each person entering the building.

**Express Admission.
Perfect for All Types of Buildings**

➤ Government Buildings
➤ Private Companies
➤ Multi-Tenant Commercial Buildings
➤ Clubs
➤ Hotels/Motels
➤ Schools
➤ Hospitals
And more…

State-of-the-Art Technology Maximizes System Flexibility

Express Admission System is easy to integrate with an existing database on a central server or to use as a stand-alone system.

> Employees/Tenants can pre-announce visitors through the internet or intranet.
> System supports multiple locations/sites and/or unattended entrances.
> Collected data is encrypted for security and privacy.
> Reports can be sorted and searched using many criterias
> Garage entrances can be the point-of-entry.
> Employee can be tracked (time in-and-out and vacation records), thus eliminating time clocks and ensuring accuracy.
> Supports group registration as an option.
> Credit cards, government cards, INS cards, employer id badges, PIV-II Federal cards, Smart Cards and personalized store cards can be identification alternatives to the driver's license, if you prefer.

Options

Insure ID Is Authentic
With the CAUTHS option, ExpressAdmission catches and reports forged IDs, on the fly. Our ID Authenticator authenticates over 2200 different IDs nationally and internationally. IDs authenticated include: passports, visas, driver's licenses, military IDs, social security cards, alien registration cards, and more…

Federal PIV-II Smart Cards Support
ExpressAdmission has full support for reading and encoding the Federal PIV-II ID cards.
